REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses:

An optical switch/modulating device or a method of forming an optical switch/modulating device comprising:

- a pump waveguide that provides a pump light to said switch/modulating device; and

- a waveguide element positioned parallel to said pump waveguide that receives the pump light that causes said waveguide element to switch or modulate a signal light running through the pumped waveguide, as discloses in claims 1 and 13.

The underline limitations is critically: the device is improved having a higher energy efficiency since the longer interaction length by using the parallelism between pump waveguide and signal waveguides and longer possible pump wavelength.

The IIDA Y ET AL reference (Single-mode silicon optical switch with T-shape SiO₂ waveguide as a control gate) discloses a waveguide element positioned perpendicular to the pump waveguide.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should
